

## Frequently Asked Questions

### What's Wrong With Dog and Cat Food?

Most caring consumers would never guess that lonely dogs and cats are confined to tiny barren laboratory cages for years on end and subjected to horrible experiments in order to test dog and cat food.

To expose this tragedy, PETA conducted a nine-month undercover investigation of a laboratory that was performing cruel animal tests for major companion-animal food companies. What our investigator uncovered, including the following, would outrage anyone with a heart:

- Lonely dogs driven mad from confinement to barren steel and cement cells
- Dogs dumped on cold concrete floors after having chunks of muscle cut out of their thighs
- Experimenters who severed dogs' vocal cords in order to keep them quiet
- Sick dogs who were languishing in their cages without veterinary care

These animals suffered so that companion-animal food companies could slap "new and improved" labels on their products.

The following companies make top-quality food for dogs and cats without harming animals in laboratories. Please help us drive animal abusers out of business by buying only from these companies. Companies not on this list either responded that they do conduct laboratory experiments on animals or failed to respond to our numerous inquiries and are assumed to conduct laboratory experiments on animals.
